PROFESSIONAL SUMMARY

Computer Science graduate with practical training in Cloud Computing and DevOps technologies. Currently pursuing Cloud Computing training with internship opportunities at Technodot Academy. Knowledge of AWS, Microsoft Azure, Linux, Bash scripting, Python, Docker, Kubernetes and Terraform. Experienced in hands-on cloud infrastructure configuration, deployment, networking, server administration and troubleshooting through practical projects. Seeking an entry-level opportunity in Cloud Engineering or DevOps.

TECHNICAL SKILLS

Cloud Platforms	AWS, Microsoft Azure
AWS Services	EC2, S3, IAM, VPC, RDS, EKS, ELB, CloudWatch
DevOps Tools	Docker, Kubernetes, Jenkins, Terraform, Ansible, Helm
Version Control & CI/CD	Git, GitHub, GitHub Actions, Jenkins
Operating Systems	Linux, Ubuntu, Windows Server
Programming & Scripting	Python (Basics), Bash, Shell Scripting, YAML
Cloud Administration	Google Workspace, Microsoft 365
Networking	VPC, Subnets, DNS, NSG, Load Balancers, SSH
Monitoring & Security	CloudWatch, Trivy, SonarQube, RBAC

PROFESSIONAL EXPERIENCE

Cloud Computing Trainee / Intern July 2026 – January 2027

Technodot Academy

- Undergoing practical training in Cloud Computing, AWS, Microsoft Azure and DevOps.
- Working with AWS services including EC2, S3, IAM, VPC, RDS, EKS, ELB and CloudWatch.
- Learned Azure infrastructure management, Virtual Machines, Networking, Storage and Load Balancing.
- Practising Linux system administration, Bash scripting and Python programming.
- Learned containerization and orchestration using Docker and Kubernetes.
- Working with Terraform, Jenkins, Git and GitHub for infrastructure automation and CI/CD.
- Learned Google Workspace and Microsoft 365 administration, including user management and access control.
- Performing practical cloud deployment, configuration, monitoring and troubleshooting exercises.

TECHNICAL PROJECTS

Cloud CI/CD Pipeline – AWS

- Builtanautomatedapplication deployment workflow using GitHub Actions.
- Containerized applications using Docker and managed container images using Amazon ECR.
- Deployed applications to Amazon EKS using Kubernetes.
- Used Terraform for infrastructure provisioning.
- Integrated Trivy for container vulnerability scanning.

Azure High Availability Infrastructure

- Configured Azure Virtual Machines and Virtual Networks.
- Implemented Azure Load Balancer and Availability Sets.
- Configured Network Security Groups and connectivity rules.
- Practiced cloud infrastructure monitoring and troubleshooting.

EDUCATION

Bachelor of Science (B.Sc.) – Computer Science

JDT Islam College of Arts and Science
